Atty. Docket: 2254.0010001/RWE/JKM

Amendments to the Claims

The listing of claims will replace all prior versions, and listings of claims in the application.

- 1. (Previously Presented): An apparatus for sampling gas phase molecules, comprising:
 - (a) a semi-permeable, gas-permeable membrane having a permeate side and a sample side;
 - (b) a support structure that supports said semi-permeable membrane;
 - (c) a heater for said semi-permeable membrane;
 - (d) a vacuum source that generates a reduced pressure at said permeate side of said semi-permeable membrane; and
 - (e) a gas chromatograph in fluid communication with said permeate side of said semi-permeable membrane,

wherein said semi-permeable membrane does not permit bulk flow of liquids and solids.

- 2-4. (Canceled).
- 5. (Previously presented): The apparatus of claim 1, wherein said semi-permeable membrane is a polymer.
- 6. (Previously presented): The apparatus of claim 5, wherein said semi-permeable membrane is a tetrafluoroethylene polymer.

LACOURSE *et al.* Appl. No. 10/772,470

Atty. Docket: 2254.0010001/RWE/JKM

7. (Original): The apparatus of claim 1, further comprising a trap in fluid

communication with said permeate side of said semi-permeable membrane.

8. (Original): The apparatus of claim 1, wherein said vacuum source is a vacuum

pump.

9. (Previously Presented): The apparatus of claim 1, further comprising a sample

loop in fluid communication with said permeate side of said semi-permeable membrane

and said gas chromatograph.

10-19. (Canceled).

20. (Previously Presented): A method for sampling gas phase molecules of a

sample, comprising:

(a) placing a semi-permeable, gas-permeable, heated membrane

having a permeate side and a sample side in fluid communication

with the sample;

(b) generating a reduced pressure on the permeate side of the semi-

permeable membrane with a vacuum pump to draw the gas phase

molecules from the sample through the semi-permeable membrane

to the permeate side and then to a sample loop; and

LACOURSE *et al.* Appl. No. 10/772,470

Atty. Docket: 2254.0010001/RWE/JKM

(c) analyzing the gas phase molecules in a gas chromatograph,

wherein the gas chromatograph is in fluid communication with the

sample loop,

wherein the semi-permeable membrane does not permit bulk flow of liquids and solids.

21. (Canceled).

22. (Previously presented): The apparatus of claim 1, wherein said semi-

permeable membrane comprises a screen coated with a polymer.

23. (Previously presented): The apparatus of claim 22, wherein said screen

comprises stainless steel.

24. (Previously presented): The apparatus of claim 22, wherein said polymer is a

tetrafluoroethylene polymer.

25-26. (Canceled).

27. (Previously presented): The method of claim 20, wherein the semi-permeable

membrane comprises a screen coated with a polymer.

28. (Previously presented): The method of claim 27, wherein the screen

comprises stainless steel.

LACOURSE et al.

Appl. No. 10/772,470 Atty. Docket: 2254.0010001/RWE/JKM

29. (Previously presented): The method of claim 27, wherein the polymer is a tetrafluoroethylene polymer.
